Luis, here's the updated pdf file that replaces the previous PSG location figures that were deleted from the earlier emails, along with the excel file. Thanks.

For the other deleted files,

Hi Vince

Beacon has requested the additional files listed in their email below, which were not included in your initial transmittal.

Thanks

Luis Vega

From: Ryan Schneider [<mailto:ryan.schneider@beacon-usa.com>]
Sent: Sunday, December 02, 2012 10:00 AM
To: Vega, Luis
Cc: Stroup, Jason
Subject: Re: FW: Re: Re: Fw: Circle Court - PSG Retrieval

Luis,

I read the email string that accompanied this message, and if you scroll all the way to the end you will see the following:

[attachment "Circle Court PSG Locations (Nov 2012).pdf" removed by Melody Lister/R6/USEPA/US]

[attachment "CC_50ftGrid_2012img.pdf" removed by Melody Lister/R6/USEPA/US]

[attachment "Img_Grid2b.pdf" removed by Vincent Malott/R6/USEPA/US]

[attachment "PSGsamples.xlsx" removed by Vincent Malott/R6/USEPA/US]

Will you please send those files? At this point all I received was the coordinates for the PSG points and an aerial image that is not geo-referenced, and therefore would only be able to provide a map showing the PSG locations and nothing else.

If you have any questions, feel free to contact me, or have Melody or Vince contact me directly.

Thank you,

Ryan

(See attached file: CC_PSGSamples_GEImg12.txt)

That's great!

I've attached a zip file that contains the original shapefile of the psg points, the 2012 image from Google Earth, and supporting reference files for the image. With respect to Beacon's request for data (msg below), we don't produce CAD-level feature drawings.

I've provided the background image, the original psg point shapefile, an Excel file of the original psg point locations, and a map in pdf format.

We do not have a layer/shapefile of buildings, and our road layer is single-line (not curb-to-curb as shown on the image).

Let me know if I can help in any other way. I'll be glad to delineate the homes/buildings if needed.

Thanks Vince!

Melody

Hi Vince,

I have attached a pdf of the latest PSG map. See what you think about the point locations, and let me know.

After we talked this morning, I looked over the point locations with respect to the image, and

instead of moving the points, I rectified the image again. I think it fits much better now. I did not move the points at all, so the coordinates for each sample are exactly the same as those

you sent me last week.

If the point locations look ok, I will send you a zipped file containing the PSG points and the image background (2012 image from Google Earth). If they don't, I will continue to tweak the image.

Just let me know. I want to get the image referenced correctly before sending it to you.
Thankya, Melody

Melody,

it looks like the points will need to be shifted south (line A8 - G8 should correspond with the fence line that separates the cleared property from the tree line), and a little west

(some points fall on structures).

Also, in the email Beacon was also looking for a shapefile (I'm assuming so they can plot the data on the site figure).

Thanks.

Subject: Re: Fw: Circle Court - PSG Retrieval
Here's the pdf requested below which shows the PSG locations from the shapefile PSGsamples.shp (previously attached).
The coordinates are maintained in the Texas State Plane, North Central Zone, NAD83 feet projection as requested.
The attached .xlsx contains the sample number, easting and northing for each sample location (which is the same projection as the .dbf from PSGsamples.dbf).

Let me know if more is needed for EA or Beacon.

Thanks!

Thanks Vince.

Attached files represent the shape files for the PSG locations. The "dbf" file can be opened in excel if you want to view the coordinate data. The coordinates are Texas State Plane, North-Central Zone (NAD83), feet.

The attached PDF file provides a frame of reference for the GPS data on a 2009 TNRIS aerial photo (older photo that does not reflect the recently built residence).

We had to make some manual adjustments to the original GPS coordinates due to satellite signal obstruction during data collection.

Beacon Environmental has requested the following information in order to generate the contour maps:

"With regards to the information/files we request/require to generate the contour maps, we would like the following:

1 - Scaled drawing of the site (e.g., AutoCad file or GIS Shapefiles) showing the relevant site features (buildings, roads, etc.) with final sample locations plotted and labeled - Note the Map parameters: system, zone, datum, and map units (for example - US State Plane, NC Zone, NAD 83, Feet)

2 - PDF file showing the sample locations on the map with the relevant features

-- If you are collecting GPS coordinates of the sampling locations, please send us an Excel spreadsheet of coordinate data in the same system/zone as the scaled drawing. Include the Sample Location ID, Easting, and Northing (if possible, please use state plane feet or UTM meters rather than Lat/Long degrees to make the map more precise)."

I would prefer to provide beacon with the maps/files generated by your GIS staff.

Please contact me with questions.

Thanks

Luis,

the weather looks good for next week, so let's plan to do the PSG retrieval on Monday, Nov. 19th. I should be at the site between 9:00 and 9:15.

Also, please forward the PSG coordinates so that I can have our GIS team plot the points on the site figure. Thanks.
